

A VAREX IMAGING COMPANY

INNOVATING SOLUTIONS,  
**TOGETHER.**

**YOUR success is  
OUR success.**

A VAREX IMAGING COMPANY

## WE LISTEN, WE LEARN

---

### ***We create solutions.***

With innovation and customer service as our priorities, VMI has leveraged decades of experience and the deep knowledge and expertise of our parent company, Varex Imaging, to become the premier provider of imaging solutions.

We understand that the industries we serve require elite expertise, attention to detail and the highest level of integrity. That is why we care, not just about providing the best solutions but about building relationships and ensuring a superior experience for our clients.

## WHO WE SERVE

---

### ***Superior Service Leading to Valued Relationships***

**Aerospace** - We serve mission critical systems and applications by engineering superior testing solutions for ongoing maintenance to ensure safety and industry compliance.

**Energy** - We alleviate risk for our customers by equipping them with safe solutions for carefully yet effectively gathering and analyzing asset intelligence in high-risk environments with hazardous materials.

**Manufacturing** - We help ensure quality production by automating processes for superior image acquisition, detection and analysis of structural degradation in manufacturing parts.

INNOVATING SOLUTIONS,  
**TOGETHER.**

## OUR TECHNOLOGY

### Software Solutions

The VMI industrial NDT software solution is an industry leading digital image acquisition and review platform that helps you process and analyze images quickly and efficiently, while maintaining a simplified user workflow. Additionally, the software can be configured to communicate with other programs.

### Digital Radiography (DR)

Through our Digital Detector Array (DDA) applications, VMI is able to offer superior solutions for manufacturing, in-service, castings, piping corrosion/erosion and weld quality application. Our portfolio of products is also available for radiation source applications ranging from gamma ray isotopes and conventional x-ray machines ranging 40kV to 15 MeV linear accelerators. From large format flat panel detectors to small form factor DDA's, VMI is sure to meet your needs.

### Computed Radiography (CR)

VMI's latest CR solutions have been completely redesigned with state-of-the art optics. Our systems are designed specifically for weld-quality radiography and the nondestructive testing service industry. Plus, they are lightweight, portable and high-performing, even in the harshest conditions.

## SERVICE IS OUR CORNERSTONE

*A passion to serve, to solve,  
to keep you safe.*

A photograph of an industrial facility, likely a refinery or chemical plant, with several tall distillation columns and piping. The scene is set against a dramatic sky with orange and yellow clouds, suggesting a sunset or sunrise. The image is partially obscured by a white diagonal band that contains text.

We listen intently to our clients and work side-by-side each step of the way to create innovative solutions specific to your needs. In other words, we solve problems for you by working with you. Because together, we go further and faster.

*Let's work together*
